

REA JET

INDUSTRIAL CODING AND
MARKING SOLUTIONS –
MADE IN GERMANY

REA JET HR

High-Resolution Coding and Marking System
based on HP Print Technology

Maintenance-Free Product Marking: High Resolution Inkjet Printers (HP)

REA JET's HR technology leverages HP Technology, a trusted solution embraced by millions of users worldwide. With its compact design, integration onto any production line becomes seamless.

The durable stainless-steel housing, intuitive operation, and thoroughly designed print head make this system perfectly suited for numerous industrial applications. These applications include, but are not limited to, pharmaceuticals, food & beverage, wood, and packaging.

Advantages:

- Thermal ink jet technology (TIJ)
- Clear & legible printing at high production speeds
- Maximum print height up to 50.8 mm and print resolution up to 600 dpi
- Maintenance-free – you receive a new print head with each cartridge change
- Simple USB transfer of data
- Optional code verification technology offered with REA VERIFIER systems

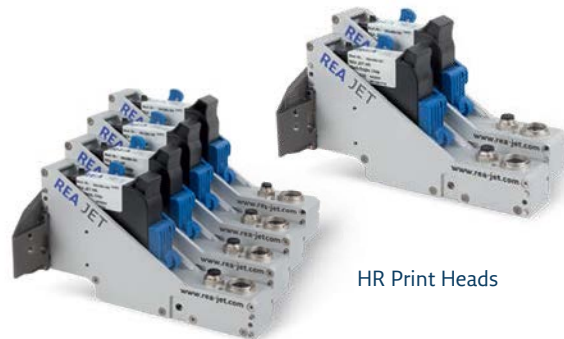

REA JET
Ink Cartridges

Thanks to its integrated Ethernet interface and full Unicode support, the HR printing technology is the system of choice for serialization tasks and track & trace projects. Up to 50 serialized prints per second and 762 m/min make the HR system the fastest printing system in its class.

HR Technology Applications:

- Variable data such as date, time, counter, shift code, database contents
- Alphanumeric texts, barcodes, 2D codes (e.g. Data Matrix codes) and logos
- Counterfeit protection and traceability
- Perfectly suited for serialization as well as track & trace tasks
- For absorbent and non-absorbent surfaces

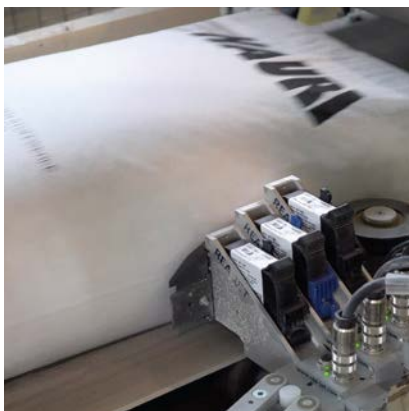

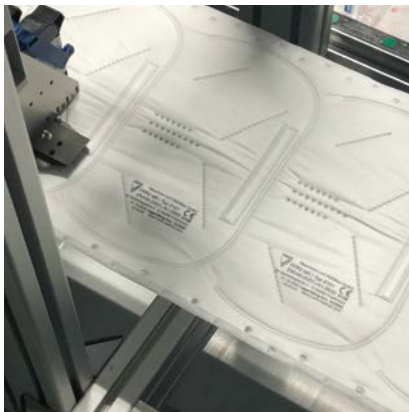

HR Print Heads

REA JET HR Controller

- Universally compatible power supply, eliminating the need for different device versions for specific countries
- Full Unicode support allows for the capability to produce printed materials in every language for international customers
- Integrated VNC server: provides a maintenance tool to diagnose and provide assistance remotely if needed
- Equipped with an integrated web server, allowing users to operate it conveniently using their PC, tablet, or smartphone
