## **CODING AND MARKING SOLUTIONS FOR IDENTIFICATION AND TRACEABILITY**

For Food and Beverage manufacturers, accurate product identification and traceability through contact-free coding and marking is essential. REA JET offers many solutions to print clear and legible best-before dates, batch numbers, codes, and other variable data on packaging materials.

Our proven technology and custom integration will help food and beverage manufacturers avoid errors, improve efficiency, increase output, and decrease costs.

### **Food & Beverage Applications**

- 1D and 2D codes
- Marking of films, bags, glass and plastics
- Variable data printing
- Best before and manufacturing date
- Label replacement
- Complete traceability

#### **For Food Labeling**

#### **For Bottle Marking**

#### **For Bag Marking**

Call REA JET at  
(440) 232-0555 to  
discuss your unique  
project needs.

If you have any questions or are looking for innovative improvements to your coding and marking processes, REA JET can provide answers, technical insights, and pricing.
