CODING AND MARKING SOLUTIONS FOR CONSUMER PACKAGED GOODS

REA JET coding and marking technology meets the speed, traceability, and compliance demands of the consumer packaging goods (CPG) industry.

Whether you're labeling for traceability, regulatory compliance, or brand protection, REA JET ensures your message is clear, consistent, and scannable at every step of your supply chain.

With innovative solutions engineered for high-speed lines and diverse packaging materials, REA JET helps CPG manufacturers prepare for GS1 Sunrise 2027 and stay ahead of evolving retail and regulatory standards.

CPG Applications

- Primary packaging (bottles, wrappers, pouches)
- Secondary packaging (cartons, boxes, shrink wrap)
- Labels, seals, and closures
- Flexible films and foils
- Paperboard and plastic containers

Why CPG Manufacturers Choose REA JET

- 2D barcode compliance for GS1 Sunrise 2027
- Reliable batch and lot tracking
- Shelf-life and expiration date marking
- Anti-counterfeiting and product authentication
- POS-ready barcode scan quality
- Enhanced supply chain transparency and FIFO inventory control
